

ZIEX ZE914 ECORUN

Performance and Economy

The ZIEX ZE914 ECORUN is the next generation, high-performance tyre made for New Zealand roads. Engineered for performance and cost saving fuel efficiency, the low rolling resistance compound offers more mileage and better wet braking.

The tyre features an asymmetric tread pattern with four straight and wide circumferential grooves for hydroplane resistance. The high-rigidity rib construction provides good wet and dry braking stability. Slots and sipes can be found throughout the tyre, optimised for even tread wear, comfort and traction.

FEATURES

ECORUN COMPOUND >

Compound promotes low rolling resistance with longer life and better all weather handling.

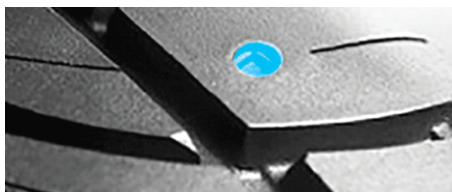

< OPTIMISED ASYMMETRIC TREAD

For longer wear life, better wet braking, less rolling resistance and lower fuel consumption.

NATURAL RADIUS CARCASS PROFILE >

For improved handling, even contact pressure and better ride comfort.

< SPECIAL EYES® TYRE WEAR INDICATORS

Shows drivers when it's time to rotate their tyres.
